INTEREXCHANGE TELECOMMUNICATIONS SERVICES TARIFF

---

**TARIFF FORMAT**

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the ACC. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc. the ACC follows in their tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.(A).
  - 2.1.1.(A).1.
  - 2.1.1.(A).1.(a).
  - 2.1.1.(A).1.(a).I.
  - 2.1.1.(A).1.(a).I.(i).
- D. Check Sheets** - When a tariff filing is made, an updated check sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages.) The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Arizona Corporation Commission.

**SECTION 3 - DESCRIPTION OF SERVICES AND MAXIMUM RATES, (CONT'D.)****3.3 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call. The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

**Formula:**

Roundtable Conference Services are available to Customers who wish to hold telephonic meetings with multiple voice or video connections simultaneously.

**B. Roundtable Audio Conference Calling Service**

Roundtable Audio Conference Calling Service provides the Customer with the ability to hold a conference with multiple participants via telephone. The Customer makes a reservation specifying the conference bridge time (or periods of time) and number of lines required. Additional Conference Calling Features may be requested at that time (as listed below). The Conference Call may be selected as either automated or attended. The Company provides the Customer with a Conference telephone number and a security code when the Customer makes the Conference Call reservation. Participants will be prompted to enter the conference security code using a touch-tone phone, or provide the host name and company name to the operator. Once the security code is entered, the caller is added to the Conference. Tones will indicate entrances to/exits from the Conference once it is underway. If a toll call access method is selected, each Conference participant will be billed by their designated toll carrier for transmission into the teleconference bridge.

My Call Conferencing Service provides the Customer with a permanent dial-in number and passcode which can be used twenty-four hours a day, seven days a week, without intervention by an attendant or administrator. The Customer may contact a Conference Attendant during any Conference Call to use enhanced features or to answer questions.

**SECTION 5.0 - PROMOTIONS AND CONTRACT SERVICES****5.1 Special Promotions**

From time to time, the Company may provide promotional offerings to introduce a current or potential Subscriber to a service not being used by the subscriber. These offerings may be limited to certain dates, times or locations and may waive or reduce recurring or non-recurring charges.

**5.2 Discounts**

The Company may, from time to time as reflected in the price list, offer discounts based on monthly volume (or, when appropriate, "monthly revenue commitment" and/or "time of day" may also be included in the tariff).

**5.3 Individual Case Basis (ICB) Arrangements**

Arrangements will be developed on an individual case basis (ICB) in response to a bona fide request from a Customer or prospective Customer to develop a competitive bid for a service offered under this tariff. Rates quoted in response to such competitive requests may be different than those specified for such services in this tariff. ICB rates will be offered to the Customer in writing and on a non-discriminatory basis.

**5.4 Contracts**

**SECTION 7.0 - GRANDFATHERED SERVICES AND RATES, (CONT'D.)****7.3 Dedicated Direct Dial 1+ Service** - This Service is no longer available to new customers.

Dedicated Direct Dial 1+ Service allows Customers to make 1+ direct dialed calls. Customers access the service via dedicated or special access T-1 (1.544 Mbps) lines. Service is available only where T-1 access is available. The Customer is responsible for payment charges associated with the dedicated T-1 circuit. Such charges are normally billed by and paid directly to the access provider (i.e. local exchange carrier). If the Customer requests that Lightyear order and bill the T-1 circuit, Lightyear will add a administrative charge equal to 25% of the monthly recurring charge for the circuit to the bill. For usage billing purposes, call timing is rounded up to the nearest six (6) second increment after the initial minimum period of six (6) seconds.

Dedicated Direct Dial 1+ Service is offered at four levels. Plan M is a basic month-to-month service. Plan 12 offers a discount off of Plan M rates to Customers that commit to a 12 month service term. Plan 24 offers discounted rates to Customers that commit to a 24 month service term. Plan 36 offers discounted rates to Customers who commit to a 36 month or longer term. If a Customer discontinues service prior to the end of the service agreement term, the Customer is assessed a penalty equal to the difference between the appropriate Plan 12 or Plan 24 or Plan 36 rates and the Plan M rates, times the cumulative billed minutes of use from the time service was initiated to the time service was discontinued.
